*For best results with **dyed mulches**, apply to your landscape beds when no rain is in the forecast. We advice having a tarp in place on your concrete driveway so there is no chance of color leaching onto the surface. If the weatherman is calling for rain during your delivery time frame, no worries! Just leave the mulch in the pile on your driveway and wait to spread it until there is a 48 hour dry period to ensure the dye will have completely cured in your landscape beds.*

Select your preferred delivery window if you ordered bulk products:
